

MADE FOR PROFESSIONAL CLUBFITTING

Wishon's expertly engineered designs are exclusively for clubfitters and clubmakers – so they can be custom fit to only you and your swing.

The difference between the off the shelf clubs and the precision mounted, custom fit golf clubs you will get from a Wishon clubmaker is huge – you can be assured that you are playing to the very best of your ability, and gaining the most from your golf equipment.

Clubfitting is the process of being fitted according to all of your unique, individual swing characteristic – the key specifications which determine your fit, can help you immeasurably in delivering more distance, more fairways and greens hit in regulation, a higher percentage of on center shots, and greater shotmaking consistency to reduce the effect of mistakes in your swing
